

FILLING BAGS QUICKLY , EVENLY WITH HIGH OPERATIONAL ACCURACY ,  
LESS MAINTENANCE AND RIGID CONSTRUCTION

**JUMBO BAG FILLING MACHINE**

Solutions for the Pharmaceutical, Food, Paint, and Chemical Sectors.

ProChem's big bag filling machines have been designed to fill even the most difficult to handle materials, using a time proven technique which involves high precision weighing coupled with a truncated pyramid table with vibrators, the filled material is weighed deaerated and densified before leaving the filling station. The ultimate goal is to produce bags that are stable, stackable, safe & easy to handle.

### Features

- Machines, which can fill single loop and 4 loop big bags
- Well proven technology
- Accurate filling of 250-1000kg bags, boxes, bins & containers.
- Reliable and easy to operate
- Simple bag size adjustment
- Low maintenance
- Low headroom required
- Mounted on integral 4 load cell weigh platform
- Auto Tare – deducts weight of bag and pallets giving only net weight of product in bag
- PLC based weighing controller.
- High accuracy level.
- Vibro table for bag compaction
- GMP compliant design, high quality surface finishes, no dead spaces.
- In built de-dusting system.

### Integrable With

#### Inline Metal Detectors

#### Inline Vibro Sifters
